

SULGAN® Daily Care – a small spray for your bathroom business

Wet wipes are popular, but not environmentally friendly. Now there is a new spray, which turns every toilet paper into wet wipes.

Wet wipes or toilet paper, which are simply flushed in the toilet, block the sewerage systems and treatment plants more and more often or need to be skimmed off elaborately. Every year, blockages or pump failures cause millions of dollars worth of damage to our wastewater systems.

Now there is an environmentally friendly alternative to wet toilet paper: SULGAN® Daily Care Spray is soothing and caring for hygiene after bowel movement and is simply sprayed onto the toilet paper. The natural substances such as horse chestnut, witch hazel and chamomile gently care for and cleanse the skin and keep the sensitive anal region clean and smooth. The remaining, caring film gives an additional feeling of freshness.

2-3 sprays on the toilet paper are sufficient. A protective film ensures that the toilet paper is not damaged. SULGAN® Daily Care Spray is fragrance-free, non-irritating, more environmentally friendly and less expensive than wet toilet paper and particularly practical for on the go.

SULGAN® Daily Care - the environmentally friendly alternative to wet toilet paper.

Available in pharmacies and drugstores.
